

## About Jumar

Jumar is a specialist IT services and solutions company with offices in the UK and Australia and more than 150 clients in 35 countries. It provides software, services and tools specifically designed to modernise applications and specialist IT recruitment solutions to major corporates across the world.

Jumar has two highly complementary divisions:

**Jumar Solutions Division** specialises in applications modernisation and development using some of the world's most advanced development tools and methodologies. It works with each client to create pragmatic solutions closely aligned to their individual needs, by providing a blend of consultancy, training and software solutions.

**Jumar Resources Division** provides a range of innovative resourcing options, including its trademark Flexible Managed Service, to clients with highly specific requirements throughout the world.

Jumar has a proven track record in providing effective services and solutions across many industry sectors and has specific expertise in insurance, banking, systems integration and government.
